Henok "Henny" Yared Software Engineer | API & Integration Developer

Minneapolis, MN • henok.yared.dev@gmail.com • (612) 489-3912 • linkedin.com/in/henok-yared-777x • github.com/Henysha • henokyared.com

Education

University of St. Thomas M. Sc. in Software Engineering — Graduated May 2026
University of Minnesota **B.S. in Chemistry** — Graduated Dec. 2017

Profile Summary

• Integration-focused software engineer with API/software development through graduate engineering, client delivery, and full-stack projects; **business impact across sales, process efficiency, and technical operations.**
• Hands-on with Java, Python, TypeScript, Spring Boot, FastAPI, NestJS, PostgreSQL, REST/GraphQL APIs, webhooks, idempotency, Swagger/OpenAPI, Docker, Postman, and automated testing - directly transferable to MuleSoft/.NET/Paradigm integration work.
• Strong documentation and requirements translation: converts evolving business needs into API contracts, system workflows, reusable components, test coverage, runbooks, and maintainable technical documentation.

Technical Skills

Programming: Java, Python, TypeScript, JavaScript, C++, SQL, HTML/CSS; Rust (foundational)
API & Integration: REST, GraphQL, webhooks, idempotency, Swagger/OpenAPI, Postman, Axios, JWT, RBAC, system-to-system workflows; transferable to MuleSoft, .NET, and Paradigm environments
Frameworks: Spring Boot, FastAPI, NestJS, Node.js/Express, React, Angular, Next.js, Prisma, SQLAlchemy, Spring Data JPA
Data / Cloud: PostgreSQL, MySQL, MongoDB, AWS (Athena, S3), Microsoft Azure, Power Platform, Dynamics 365
DevOps / Testing: Docker, Git/GitHub, GitHub Actions, Azure DevOps, Jenkins, CI/CD, Jest, pytest, Playwright, Cypress, Vercel
Documentation / AI: API contracts, Swagger/OpenAPI, requirements translation, technical documentation, Cursor, GitHub Copilot; CSPO (Sep. 2024)

Work Experience

Self-employed — Minneapolis, MN
Freelance Software Developer - API & Web Integrations — Jun. 2026 - Present (<1 yr)
• Delivered **three client websites generating $2,400 in project revenue**; built and deployed React/TypeScript applications with reusable components and production-ready workflows.
• Integrated Cal.com appointment availability and booking into the Berukti website, **saving one client four administrative hours per week**; validated browser flows and managed Git/Vercel deployments.

Thomson Reuters
Tax Data Operations Associate - Systems & Data Workflow (Contract) — Jan. 2026 - Apr. 2026 (4 mos)
• Reduced tax-data corrections by **15%**, saving **40 staff hours (~$1,200)** over a four-month contract by improving review accuracy, documentation, and handoffs.

Amazon — Shakopee, MN
Fulfillment Operations - Systems & Process Workflows — Nov. 2023 - Present (2+ yrs)
• Identified recurring scanner-driven fulfillment exceptions, **reducing rework by 10% and saving ~$4,000 annually** in staff time while maintaining quality and throughput.

TradeFast Corp — Burnsville, MN
Founder & Technical Operations Lead — Aug. 2017 - Feb. 2021 (3.5 yrs)
• Generated **approximately $39,000 in kiosk sales revenue over five months**; founded and operated a device resale/service business, managing inventory, diagnostics, suppliers, and customers.

Beckman Coulter Diagnostics — Chaska, MN
Senior Technical Quality Control - Systems & Documentation — Oct. 2020 - Aug. 2021 (10 mos)
• Improved QC inspection documentation, **reducing repeat reviews by 12% and saving ~$3,600 annually** while maintaining SOP compliance, traceability, and quality records.

AT&T
Mobile Sales Representative — Aug. 2019 - Mar. 2020 (8 mos)
• Achieved **110% of monthly sales quota and ~$18,000 in monthly device and service sales** by matching customers with mobile devices and service plans.

3M — Maplewood, MN
Software Developer Intern - Technical Systems & Documentation — Mar. 2016 - Nov. 2018 (2.5+ yrs)
• Improved a technical documentation workflow, **saving five staff hours per week (~$7,500 annually)** through clearer records and more efficient handoffs.

Best Buy — Shakopee, MN
Mobile Sales Consultant — Sep. 2015 - May 2016 (9 mos)
• Achieved **105% of mobile sales targets, averaging ~$12,000 in monthly sales** through device recommendations and customer consultations.

Software Projects

NebirroAPI - API & Integration Platform — **Jul. 2026**
• Built a NestJS/TypeScript/PostgreSQL API with authentication/RBAC, transfers, audit logs, idempotency, webhooks, Swagger/OpenAPI, SDK, Docker, CI, and automated tests.
• Processed **1,000 simulated transfers with zero duplicate transactions** during retry testing; validated idempotent API behavior and reliable system-to-system integration workflows.

TrustGraph Engine - Risk/Fraud Integration Service — **Jul. 2026**
• Built a FastAPI + React/TypeScript + PostgreSQL risk/fraud service; evaluated **10,000 synthetic records and reduced processing time from 30 to 12 seconds** with deterministic scoring, alerts, Docker, and automated validation.

CapitalCircle - Java/Spring Integration Backend — **Jul. 2026**
• Built a Java Spring Boot/PostgreSQL backend with JWT, REST APIs, Flyway, Docker, and a React/TypeScript client; supported **100 concurrent simulated users with p95 API latency below 300 ms**.
